

THE SITUATION IN 2021: KAYAPO AND PANARA TERRITORY

Fires in 2021 (orange) and deforestation surrounds the 10.5 million ha block of ratified Kayapo indigenous territory plus the 500,000 ha Panara indigenous territory contiguous with Kayapo on their southwestern border.

10 million ha of Kayapo/Panara territory receives conservation and development investment and remains intact. A band of some 1.5 million ha along the eastern border is where the Kayapo never allied with conservation NGOs receives no conservation and development investment and consequently is heavily invaded by illegal goldmining (yellow) and logging
